

Interview Evaluation Report

Date: 14 June 2026

Interviewer: Manas Mishra

Evaluation Criteria

Each question was evaluated on a scale of **0 to 5**:

- **5** – Excellent
- **4** – Good
- **3** – Satisfactory
- **2** – Average
- **1** – Poor
- **0** – Not Acceptable

Candidate: Om Mishra

Question	Topic	Score
1	What will be our work?	3
2	HTTP vs HTTPS	3
3	Complete Backend Workflow	2
4	What is Routing?	2
5	What are Repositories, Services, and Middlewares?	0
6	HTTP Methods that we will use	1

Overall Assessment

Om demonstrated a basic understanding of the project requirements and fundamental web concepts. He was able to provide satisfactory answers regarding the project workflow and the difference between HTTP and HTTPS. However, his understanding of backend architecture concepts such as repositories, services, middlewares, routing, and HTTP methods requires improvement.

While his current technical understanding is not yet at the desired level, he has shown sufficient foundational knowledge to begin contributing to the project. With proper guidance, practical exposure, and continuous learning, he is expected to improve his technical capabilities and become productive within the team.

Overall Performance: Can Be Improved

Recommendation: Suitable to work on the project under supervision and mentorship. Regular technical reviews and learning sessions are recommended to strengthen his backend development knowledge.

Candidate: Ayush Sengar

Attendance and Professional Conduct

Despite multiple reminders regarding the interview date and timing, Ayush Sengar did not attend the scheduled interview. Furthermore, no prior notice was provided regarding his unavailability.

Upon being contacted and requested to join the meeting, he stated that he was in the market with his mother and would be late. While personal commitments can arise, professional communication requires informing the team beforehand whenever attendance is not possible.

Assessment

Due to non-attendance, no technical evaluation could be conducted.

Technical Score: Not Evaluated

Attendance Status: Absent Without Prior Notice

Remarks

The lack of prior communication and failure to attend the scheduled interview is considered unacceptable from a professional standpoint. Team members are expected to communicate scheduling conflicts in advance and demonstrate accountability toward committed meetings.

Overall Performance: Not Acceptable

Recommendation: Not recommended for project onboarding at this stage. Re-evaluation may be considered in the future upon demonstrating improved professional communication and accountability.

Final Conclusion

The interview was conducted to evaluate both technical understanding and professional responsibility.

- **Om Mishra** attended the interview and demonstrated basic technical knowledge. Although several areas require improvement, he possesses sufficient foundational understanding to begin working on the project under guidance and supervision.

- **Ayush Sengar** did not attend the interview and failed to provide prior communication regarding his absence. As a result, no technical assessment could be performed, and his conduct did not meet the expected professional standards.

Final Decision

Om Mishra: Approved to work on the project under mentorship and supervision.

Ayush Sengar: Not approved for project onboarding at this stage due to non-attendance and lack of professional communication.
